OUR GOAL IS SIMPLE

To protect and support our clients
and their organisations into the future.

Why work with specialists like McClarrons?

Working with a broker with expert insight in your sector is essential to avoid key details of your operation being missed and your insurance cover not supporting you as needed.

The care industry is full of complexities, which are only highlighted by increased pressures from regulators and public perception. The care sector has never been in the public eye as much as it is today, and any losses to your business will only be aggravated further if the insurance cover you have to protect against them is not sufficient.

It is our aim at McClarrons to ensure that whatever challenges your organisation may face in the future, it will not be an inadequate insurance policy.

How we work...

There are differences in each and every one of our care sector clients, and these variances have the deciding factor on which policy is going to be suitable and what cover is required.

Working with McClarrons, your dedicated Account Executive will first review your current insurance and requirements, before using access to specialist insurers to present you with a proposal of cover, explaining the benefits and differences of the policies available so that you can make an informed decision. Through our independence, we are able to truly work in our clients' best interests, ensuring we offer solutions that work for your organisation.

In the event of a claim...

McClarrons have a dedicated in-house claims team whose sole job it is to support our clients when they have suffered a loss to their business. Access to specialist loss adjusters and good working relationships with insurers allows your assigned Claims Handler to work on your behalf to an efficient and fair settlement. Should the worst happen, we are there to support our clients - from notification through to final settlement.

Cover benefits...

Specialist schemes, combined with more universally available cover means that with McClarrons, you can be covered only for what you need, giving you the most out of your premium, with features including:

- Property
- Employers' Liability
- Public Liability (including Abuse)
- Business Interruption
- Medical Malpractice
- Directors & Officers/Trustees Liability
- Professional Indemnity
- Motor (including Mini Buses)
- Legal Expenses
- Cyber

As an independent insurance broker, our service starts and ends with you, our client. We are able to deliver this service through access to insurers who specialise in the sector, driven by your requirements only. This gives us a greater choice, and you the right options.

Speak to our specialist Care Team to see how we can help you.
